## WORK EXPERIENCE

### Full-Stack Developer

BluBear S.A

05/2023 - Present

*Achievements/Tasks*

- Full-stack development of the website 1001carros.com using Nuxt 3, with project deployment through SSR
- Full-stack development of the 1001carros.com ecosystem administrator, using the VILT stack to manage inventory, users, pages, and more
- Design and maintain a cloud architecture using AWS services for deploying various projects. The services utilized include Lambdas, EC2, ELB, S3, CloudFront, API Gateways, among others
- Integration of Meilisearch as an intelligent search engine to enhance search optimization
- SEO Optimization of the 1001carros.com website for Google's search engine
- Use of the SCRUM framework as an approach for agile software development

### Full-Stack Developer

WOMPAD S.A

11/2021 - 06/2022

*Achievements/Tasks*

- Full-stack development using jQuery on the frontend and PHP on the backend. Proficiency in relational database management
- Development of new modules for the CMS of online stores, from database tables to frontend views
- Integration of new features into the purchasing process of the stores: discount coupons, free shipping, etc
- Use of the SCRUM framework as an approach for agile software development

### Front-End Developer

Box Solutions

06/2021 - 10/2021

*Achievements/Tasks*

- Front-end development of a web platform with Angular 11, utilizing Angular Material as the framework for styles
- Integration of a serverless database with Firestore from Firebase
- Authentication via Firebase
- Forms and data export to Excel files

## SKILLS

Laravel

Vue3

TypeScript

Angular

React

Tailwind CSS

AWS

NodeJS

Firebase

SQL

## EDUCATION

### Computer Science Engineering

Escuela Superior Politécnica del Litoral

10/2018 - 08/2023

*Courses*

- Web/Mobile Development
- Software Engineering
- Databases
- Cloud Computing

## CERTIFICATES

AWS Certified Cloud Practitioner (03/2023 - 03/2026)

## PERSONAL PROJECTS

Ron San Miguel (05/2023 - 08/2023)

- From design in Figma to production code. Front-end development of the Ron San Miguel website using Next 13 for SSR. Hosting the application through SST and AWS serverless services, including Lambdas and API Gateway

Livet Medical Center (05/2022 - 08/2022)

- Frontend development using React, Material UI for design, and Redux for state management. Cloud hosting of the application and authentication through AWS Amplify and Cognito. Implementation of the serverless Firestore database

Online Multiplayer Card Game (11/2022 - 01/2023)

- Development of a WebSocket server using Node.js, Express, and WS. Implementation of a serverless hosting infrastructure using AWS services, including Lambdas, API Gateway, and S3 for the WebSocket server, while the client is hosted on itch.io. Client development in Godot using GDScript

Proalco (01/2022 - 02/2022)

- Development of the website using Angular and SCSS. Cloud hosting of the application with Amplify. Implementation of an email service using AWS SES
